

# Ashish Chaurasiya

Backend Developer — Game Developer

Gorakhpur, Uttar Pradesh, India — [ashish.chaursiaa@gmail.com](mailto:ashish.chaursiaa@gmail.com) — +91-6388239141

LinkedIn: [linkedin.com/in/ashish-gamedev](https://www.linkedin.com/in/ashish-gamedev) — GitHub: [github.com/DrDead0](https://github.com/DrDead0) — Portfolio: [heyashish.me](https://heyashish.me)

## PROFESSIONAL SUMMARY

Backend and Game Developer with hands-on experience building REST APIs, real-time systems, authentication workflows, and containerized backend services, alongside developing performance-focused 2D and 3D games. Skilled in Go, Gin, Node.js, MongoDB, Redis, Docker, Unreal Engine, C++, and Blueprints, with experience in API development, WebSockets, CI/CD pipelines, game mechanics, physics, rendering, and optimization.

## EDUCATION

**Vellore Institute of Technology (VIT)**

2022 – 2026

B.Tech in Computer Science and Engineering — CGPA: 7.8

## TECHNICAL SKILLS

**Languages & Frameworks:** Go, Gin, JavaScript, TypeScript, Node.js, Express.js, C++, C#, C, Python, SQL

**Backend & Databases:** REST APIs, WebSocket, Socket.IO, JWT, bcrypt, RabbitMQ, MongoDB, PostgreSQL, MySQL, Redis

**Cloud & DevOps:** Docker, Docker Compose, Kubernetes, AWS, Google Cloud, CI/CD Pipelines, GitHub Actions, Jenkins, GitLab CI/CD, Prometheus, Grafana

**Tools & Technologies:** Git, GitHub, Postman, Cloudinary, Multer, Vercel, Railway, Heroku, HTML, CSS, Leaflet.js, Unreal Engine, Blueprints, Blender

## EXPERIENCE

**OSINTERS HUB (OPC) PVT LTD — Full Stack Developer Intern**

Apr 2026 – Jun 2026

*JavaScript, Node.js, Express.js, REST APIs, Postman, Git, GitHub, CI/CD*

- Developed an **internal backend microservice** using **JavaScript, Node.js, and Express.js**, capable of handling **10K+ service-to-service API requests/day** across multiple internal application services.
- Built, tested, and validated **REST API endpoints** using **Postman**, supporting service-to-service communication and data exchange across the internal microservice architecture.
- Managed source code with **Git and GitHub** and contributed to **CI/CD workflows, testing, debugging, and service integration** throughout a **2-month development cycle**.

## PROJECTS

**ZeroAxiis Backend (Jul 2026)**

[GitHub](#)

*Go, Gin, MongoDB, Redis, Docker, Docker Compose, JWT, Cloudinary, GitHub API, YouTube API*

- Architected a **RESTful API** using Go, Gin, and MongoDB, targeting **5K+ API requests/day** across **7+ content and administrative modules**.
- Secured administrative workflows with **JWT authentication, bcrypt password hashing, and Redis session management**, enforcing a **15-minute inactivity timeout**.
- Integrated **3 external services** (Cloudinary, GitHub API, YouTube API) and containerized **3 core services** using Docker Compose for reproducible deployments.

**Social Media Backend (Aug 2024)**

[GitHub](#)

*Node.js, Express.js, MongoDB, JWT, bcrypt, Multer, Cloudinary, AWS S3*

- Engineered a **REST API** using Node.js, Express.js, and MongoDB, supporting **1K+ API requests/day** through a modular backend architecture.
- Accelerated media upload workflows using **Multer and Cloudinary**, reducing processing latency by **55%**.
- Strengthened API security using **JWT, bcrypt, and input validation**, reducing identified vulnerabilities by **40%**.

**Haunted Quest – 2D Platformer (May 2024)**

[GitHub](#)

*C#, Blender, Visual Scripting, URP, Cinemachine*

- Developed a performance-focused **2D platformer** sustaining **60+ FPS** on low-end PC hardware.
- Reduced asset load times by **35%** through sprite batching and texture streaming optimizations.
- Implemented **Cinemachine-based adaptive camera mechanics** for smoother player tracking and transitions.

**Car Racing Game (Jan 2025)**

*Unreal Engine, Blueprints, Lumen, Niagara, Chaos Vehicle System, MegaScan Assets*

- Created a **3D racing game** sustaining **120 FPS** using Chaos Vehicle physics and optimized vehicle controls.
- Enhanced Lumen lighting and rendering pipelines, improving visual performance and realism by **30%**.
- Optimized **Niagara particle systems and real-time rendering** to maintain consistent gameplay performance.

## CERTIFICATIONS

- **Intro to AR/VR/MR/XR: Technologies, Applications & Issues** – University of Michigan (Coursera), Dec 2023
- **Networking and Security Workshop** – I-Medita & VIT Bhopal (Cisco Partnered), Sep 2024
- **Python Essentials** – Vidyarthi, VIT Bhopal, Jul 2023
- **Fundamentals of AI and ML** – Vidyarthi, VIT Bhopal, May 2022
